

SnapTak® PIM-guard adjustable hangers: New Product

Announcing the release of a new line of cable hangers designed to simplify tower top cable management and reduce PIM: SnapTak PIM-guard adjustable hangers. Traditional metal hangers have required the use of custom grommets to accommodate various size cables, increasing installation time. SnapTak is designed with a flexible section that self-adjusts to the cable diameter during installation. This innovative design enables one hanger to support a range of cable sizes without the need to insert a grommet and the engineered composite material eliminates PIM near critical antenna and RRU connections.

- PIM free cable attachment
- Simplifies cable management on the tower
- Four sizes for cables ranging from 4 mm to 16 mm
- Eliminates the need for grommets
- Reduces installation time by up to two-thirds
- Simplifies hanger inventory and saves storage space
- Delivers exceptional reliability, even in extreme weather conditions
