

NETCONNECT Category 6 CPR Class Cca and Class B2ca enhancements

Europe Communication

Effective October 15, 2018

CommScope is pleased to communicate some exciting enhancements to the existing NETCONNECT “CPR-Euroclass B2ca/Cca” Cat 6 U/UTP cable offering in Europe.

6% reduction of jacket outer diameter

The reduced jacket diameter will provide customers with pathway space limitation concerns higher fill ratios, reduced footprint and weights associated with larger cables.

Addition of a “CommPak Box” package option

The option to order the higher rated CPR cables in our most popular package option “CommPak box” will be a welcome addition. Installers, Distributors and End-Users alike will appreciate having a choice that best fits their particular needs.

Although CPR Euroclass Cabling is still in its infancy; Commscope is continually striving to enhance our ability to service our customers and provide better features and opportunities to reduce the costs associated with installation, shipping/storage and handling.
