

VTRANSXKC-7W-3

Dual-polarized output transition for HX, USX & SHPX4 antennas, 7.125 - 8.50 GHz, UBR84 flanges

Product Classification

Product Type Output transition kit

General Specifications

Polarization Dual

Electrical Specifications

Operating Frequency Band 7.125 – 8.500 GHz

Packaging and Weights

Included Flange hardware kit | OMT hardware kit | OMT transition

* Footnotes

Operating Frequency Band Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.
