

REDEFINING TOMORROW. TOGETHER.

At CommScope, we believe the networks of tomorrow will require different technology, different infrastructure and a new kind of technology partner.

We believe:

- All access should be seamless
- Problems can be solved together
- Trust and integrity are essential for mutual success

Our combined expertise in broadband, wireless and video will help us address convergence of technologies, roll-out of 5G, enabling smart cities and IoT. Together, we are bringing our strength to innovate and deliver the best connectivity throughout your network.

EXPANDED EXPERTISE

We are stronger. From unlicensed to licensed and inside the home, the organization or outdoor – we have more solutions and combined knowledge.

We will deliver more creativity.

Networks are expected to do more. Partner with a proven innovator with an unmatched IP portfolio in wired and wireless, licensed and unlicensed wireless technologies and experience in centralized and distributed network architectures.

REACH AND RESPONSIVENESS

Together, we have more experts, more locations and more partners. Our priority is supporting you, delivering on our commitments and continuing to keep your trust.

Let's realize our potential together – whether it's expanding your network, improving performance, enabling new services or creating the most compelling user experiences.
