

NGF-SPLTR-MODULES

Base Product

Next Generation Frame (NGF) Modular Splitter Modules for FTTx applications

The NGF Modular Splitter Block utilizes CommScope's splitter packaging technology and is used in CommScope's Next Generation Frame (NGF) which has unmatched density for fiber management and signal distribution.

Features:

- Designed for use with CommScope's High-Density NGF System
- Modular design allows up to 48 32-way splitters into one 30" NGF Distribution Frame
- NGF splitter block accepts 4 mini plug-and-play splitters

Product Classification

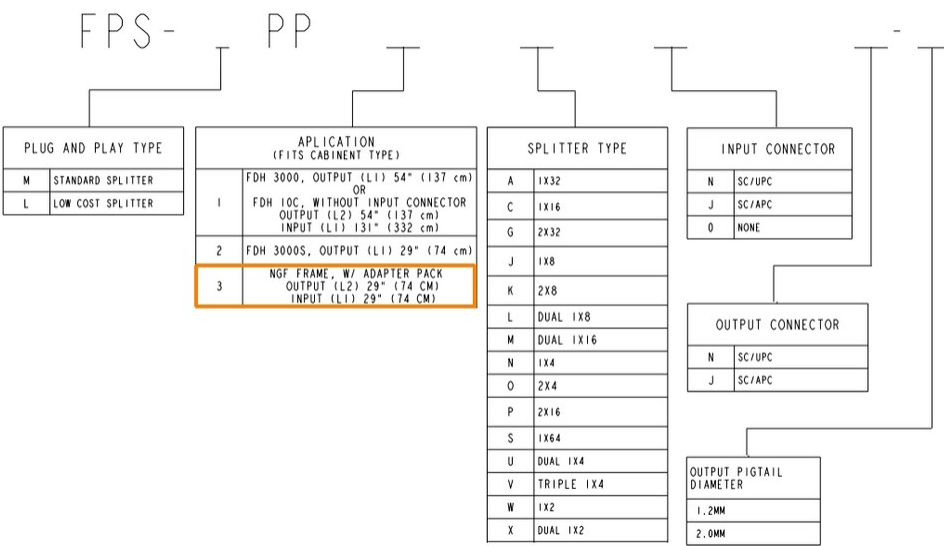

Regional Availability	Asia Australia/New Zealand EMEA Latin America North America
Portfolio	CommScope®
Product Type	Splitter module
Product Series	NGF

General Specifications

Functionality	Splitting
Application	For use with NGF frames
Interface, Input	SC/APC SC/UPC
Interface, Output	SC/APC SC/UPC
